Redesigned provider Web site easier to use, more specific

The IHCP is revamping its provider Web site to make the site more contemporary and user-friendly. The site will be organized to make it easier to find information and will let providers "click" to information about updating their provider profiles, billing, eligibility verification, prior authorization, educational programs, and more.

You can expect to see the revised site up and running by July 1, 2010. Watch for more information in future IHCP banner pages and newsletters.
